

MISSOURI BOATING STATISTICS & DROWNINGS

2024 Edition

2023 Statistics

Department of Public Safety
Missouri State Highway Patrol

Introduction

This booklet is published by the Missouri State Highway Patrol as an aid to persons who are interested in recreational boating crashes and accidental drowning incidents occurring in the state. It contains information which provides a comprehensive look at statewide crashes and accidental drowning incidents as experienced in 2023.

The Missouri State Highway Patrol is the central recreational boating data collection agency for the State of Missouri. The Patrol investigates all recreational boating crashes occurring in the state and either investigates or gathers data on accidental drowning incidents occurring in state and private waters.

Interesting Statistics

Here at a glance are some interesting statistics found in this booklet:

- In 2023 there were 6 persons killed and 89 persons injured in recreational boating crashes in the state of Missouri. This was 11 fewer killed and 12 more injured than in 2022. There was an increase of 4.6% in total crashes statewide (159) compared to 2022 (152).
- In 2023 there were 159 total crashes including 102 property damage only, 51 injury, and 6 fatal.
- "Operated too close to shoreline" was the leading contributing circumstance for all crashes followed by "Inexperience of operator." "Impairment (alcohol/drugs)" was known to have been a contributing circumstance to six crashes statewide.
- "Inexperience of the operator" crashes resulted in the death of one person. This was 16.6% of the total persons killed in crashes.
- Of all crashes reported statewide, 78.6% (125) occurred during the months of May through August.
- Most crashes occurred on Saturday (55) and Sunday (28) and most (106) occurred between noon and 8:00 p.m.
- Of all crashes reported statewide, 62.9% (100) involved only one watercraft. All six fatal crashes involved only one watercraft.
- Of the 177 boat operators involved in crashes, 98 had no prior boater education.
- In 2023, there were 20 persons killed in accidental drowning incidents occurring in state waters, five fewer than in 2022. There were also two accidental drowning incidents that occurred on private property and an additional five that were flood/other related.
- Most drownings occurred on Sunday (9), Thursday (5), and Friday (5) and during the months of July (9) and March (5).

It is hoped that the information in this booklet will be of value to you. Certainly it is the most comprehensive look available at statewide crashes and accidental drowning incidents in Missouri.

Alcohol Involvement

Drinking and Crashes - Whether or not a person has been drinking cannot always be determined at the scene of a crash. Because of the time lapse from the moment of occurrence until an officer arrives at the scene to make the investigation, a person's condition concerning drinking can change a great deal. In cases where the individual may have been removed to a hospital, doctor's office or funeral home, his/her condition may never be determined.
